

## Why Have a Web Site?

A website is a great opportunity for any business! With a website your business is accessible to anyone, anytime, anywhere in the world that has a computer and an Internet connection. A website allows businesses and individual's exposure on a local, national, and even international levels. Having Plus I.T. design a webpage for your business will enable your business to achieve that next level of exposure.

A website works for you even when you are not there. Individuals can go to your website and learn about your business, your products and/or services, and how to get in touch with you.

You have many options with a website, from all the bells and whistles to a very basic site with just a few pages. This ensures that people who are in need of your products/services can find you. Plus I.T. custom designs sites that are tailored to your specific needs and audience.

Websites are convenient! Most people have access to a computer at work and/or at home. It only takes a moment to type what you are looking for into a search engine and get results, as opposed to having to drag out a phone book. Plus I.T. will submit your site to the top three search engines as part of your website package.

The most important reason to have a website is to keep up with your competition! Does your competition have a website? If they do, you should think about getting one too. If they don't, this is a perfect opportunity for you to differentiate your business from your competitors. Plus I.T. can help you take your business to the internet.

*Plus I.T. also designs Brochures, Logos, Business Cards, etc.*

*For questions, examples of sites we have designed or a quote,
